

MADETOSA

MADETOSA is a family business dedicated to the production of poplar plywood . Besides the production of plywood, MADETOSA is specialized in afforestation of land with poplar clones, with average volumes of 4,500 trees per year (about 11.25 hectares).

Poplar plywood:

The poplar plywood is a lightweight product, with little odor, an off-white, durable and easy to work with color, this makes it ideal for use in the food industry (packaging of fruits, vegetables, seafood and other support food) and in industry (furniture, DIY and packaging).

Technical details

Dimensions	Max 1200 x 1200 mm Other dimensions on request
Thicknesses	From 3 mm to 12 mm
Density	From 420 to 450 kg/m ³
Surface finish	Sanding on 1 side or both sides

Plywood qualities

B: White with small knots and smooth color variations.

BB: Supports changes of stronger color and black small knots not skipped.

C: Supports strong variation of dark color, black knots and some manufacturing defect, taking care that it does not affect the strength of the board.
